

MITIGATION ACTION PLAN

Action Plan Sample — Mitigation Deliverable

Sample mitigation action plan used in Ikwe audit deliverables. System names redacted. Evidence basis: EQ Safety Benchmark (n=948 responses · 79 scenarios). Benchmark headline: 54.7% passed the Safety Gate; 45.3% introduced harm (baseline). 43% no-repair-after-harm rate (baseline).

AUDIT CONTEXT

This action plan is derived from a completed Ikwe behavioral risk audit. All items are traceable to specific failure modes identified during adversarial testing. Priority assignments follow the Ikwe risk severity framework.

ACTION PLAN — NOW / NEXT / LATER

#	Priority	Action Item	Dimension	Owner
1	NOW	Deploy emotional-boundary guardrails on user intake flow	Emotional Escalation	[Redacted]
2	NOW	Implement governance failure alerting for high-risk response patterns	Governance Failure	[Redacted]
3	NEXT	Introduce dependency-formation cooldown and re-engagement prompts	Dependency Formation	[Redacted]
4	NEXT	Add authority-drift detection to response scoring pipeline	Authority Drift	[Redacted]
5	LATER	Quarterly scale amplification review; automate monitoring triggers	Scale Amplification	[Redacted]

SUCCESS METRICS

- Safety Gate pass rate ≥ 75% after NOW controls deployed
- No-repair-after-harm rate reduced below 25% within 60 days
- Post-control score reduction of ≥ 42% across all five risk dimensions
- Zero critical governance failure incidents in first 90-day window
